Lower Federal Road Improvement Project Update #1 CT DOT Project Number 0018-0135

November 17, 2021

Construction started this morning with the saw cutting of a 500 foot length of State Route 202 (Federal Road) at 322 Federal Road, where Ramen House restaurant was once located. The contractor, Burns Construction, is relocating an underground gas line operated by Eversource. See below.

When completed Burns will move to the Chic-Fil-A and ShopRite intersection where a similar task will be undertaken. This work will be done during overnight hours.

Over the next five months other contractors will be relocating utility poles and other underground utilities. Starting April 2022 roadway construction begins.

This project is fully funded by the Connecticut DOT and includes 5,300 feet of roadway improvements on Federal Rd from BJ's to the shopping plaza at 317 Federal Road, and 800 feet of improvements on Old New Milford Road. Improvements include sidewalks, additional turning lanes, new traffic signals and bus shelters. Construction is scheduled for completion in November 2023.

The plan of the finished roadway can be viewed at <https://www.brookfieldct.gov/planning-commission>.
